Inquiry response received after canceling Sonoran University order 9/27/2024

  **Emily**  10/3/24
To:  

Hi Andrew,
It's nice to e-meet you. Thank you Dan for the introduction.
My name is Emily  and I am a Client Relations Manager at 
(Discovery and Development)-Disease Modeling Division. We have over 20 years of experience in a broad range of innovative preclinical and translational research. We offer both customized and standard preclinical *in vivo* pharmacology services in addition to new model development and validation.
Our expertise is the *in vivo* testing of potential therapeutics in rodent models of diseases, including oncology, immunology and inflammation, metabolic diseases, ischemia and fibrosis, and rare disorders.

Do you know which *in vivo* inflammatory model you would be interested in? Please see the attached slide deck which outlines our capabilities and let me know what questions you have. I'd be happy to set up a call as well.

Thanks,
Emily

Emily 
Client Relations Manager,
